Q&A

Can't search for a bracelet or connect when binding?

Android system:

1 .Please confirm that the mobile phone Bluetooth is turned on, and the Bluetooth logo is not displayed on the wristband (if the Bluetooth ring is displayed on the wristband, It Indicates that It has been connected). Close to the bracelet, try searching and connecting again, and make sure the phone system is Android4.4 or higher.

2. If you still can't connect, go to Phone Settings→ Application Managements Authorization Management→App Rights Management, find the application [WearFit], and mark all the permission as "Allow" then enter the phone settings→GPS positioning to open the GPS location function of the phone, restart your phone and try to connect.

IOS system:

1. Please confirm that the mobile phone Bluetooth is turn on, and the Bluetooth logo is not display on the wristband(if the Bluetooth logo is display on the wristband , it indicated that it has been connected by other devices, please release the Bluetooth beforehand). After the Apple mobile phone is connected once, if you turn on the mobile phone Bluetooth again, the Bluetooth device will be connected by default, so you can go to the phone setting →Bluetooth →ignore this device , the APP can detect the bracelet.

2. After the bracelet is bound, the display is not connected, or the connection is display but the power is 0%/? At this point, the phone is not successfully bound to the bracelet. Please re-bind.

3. App no data display? In the main interface, pull down and refresh the data

manually to display the data in the APP. Automatically synchronization of data for each hour. In addition, the whole point measurement should be turned on. Our column diagram of step counting, heart rate and fatigue all read the whole point data. If it is not open, the histogram has no data. After the App pull down is **refreshed , the data does not load?**

4. App setting → Restore Bracelet Factory Setting → Click to restore factory settings→Button Shutdown →Reboot the Bracelet to connect to the App. Normally use the bracelet and the data can be loaded.
