FAQ

Can't find the smart or can't establish connection?

Android system:

1. Please make sure the Bluetooth is turned on, and the Bluetooth sign is not on the smart band (The smart band are connected if there is Bluetooth sign.) Put the smart band and the device side by side, try to search and connect. The connection can be established on Android 4.4 and above.
2. Still unable to connect, enter Setting — Application management—authorization management—application access authorization, find Wearfit 2.0, allow all the access; enter into Setting again to turn on GPS location service, restart the phone, try to connect again.

IOS system:

Please make sure the Bluetooth is turned on, and the Bluetooth sign is not on the smart band (The smart band are connected if there is Bluetooth sign. Please forget the device first). Go to setting — Bluetooth — forgot this device, after that the APP will be able to detect smart band.

After binding the smart band, it shows not connected or remaining battery is 0%?

The smart band and the device is not connected successfully, please bind the devices again.

No data shown on APP?

Pull down to refresh the main page, the data will be synchronized and shown on the APP. Automatic data synchronization will only be done on the first-time connection establishment. Afterward, the data will be synchronized automatically hourly. Besides, turn on the hourly measurement. The APP read the hourly data (steps, heart rate) from the smart band. There will be not data if the hourly measurement is off.

After refreshing, no data shown.

Go to app setting-reset factory setting-press-smart band turn off – turn on the smart band and connect to the APP again. The data will be able to load on the APP.

Time is not synchronized.

Go to Setting-Application management-turn on APP access-connect the smart band and the APP again-Pull down to refresh the APP.
